CABLING

UTP | FIBER OPTIC | COPPER

Our structured cabling services optimize network infrastructure, guaranteeing efficient data and voice connectivity across your organization. We deal with comprehensive range of single mode and multi mode fiber optic cable and components.

WE OFFER FOLLOWING NETWORK CABLING SERVICES:

New Network cabling installation

Add, Move and change in existing network cable

Efficiently organize and tidy up network cabling racks

Testing CAT-6 / CAT-6A cabling with Fluke tester

Fiber Optic cable pulling and Termination

Terminating, Dressing and Patching cable in server rooms

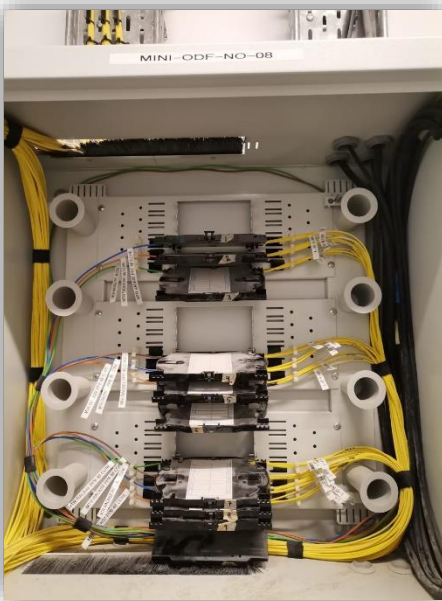

In addition to our core services, we also provide specialized expertise in **Optical Fiber Splicing** and Testing. Our team of highly skilled technicians is adept at the installation of fiber optics, delivering solutions tailored to the unique requirements of any project, regardless of its scale. Notably, we excel in the **implementation** of **Fiber-To-The-Home (FTTH)** solutions, aligning closely with the guidelines established by **Etisalat** and **DU** for new construction projects throughout the UAE.

CCTV SURVEILLANCE SYSTEM

We offer state-of-the-art CCTV surveillance systems designed to fortify the protection of your assets and premises. Our solutions are characterized by **real-time monitoring** and **advanced security** features, ensuring the utmost safety and **peace of mind**.

Our CCTV solutions cater to a diverse array of sectors, including prominent retail outlets, banks, money exchange services, jewelry stores, warehouses, commercial edifices, and private residences.

With the expertise of our dedicated team, we seamlessly install **user-friendly CCTV systems**. These systems incorporate premium-quality components, delivering high-definition (HD) and 4K video output to meet your surveillance needs effectively and efficiently.

WE OFFER WIDE RANGE OF CCTV CAMERAS BASED ON THE SPECIFIC SURVEILLANCE REQUIREMENTS OF THE ENVIRONMENT IT IS INSTALLED IN:

Dome Cameras: cameras with a wide-angle view, suitable for indoor and outdoor surveillance. They are often used for general security purposes.

Bullet Cameras: designed for long-distance viewing. They are typically used in outdoor locations and have a visible presence to deter potential intruders.

PTZ Cameras (Pan-Tilt-Zoom): PTZ cameras are motorized and can pan, tilt, and zoom to focus on specific areas. They are highly versatile and used in scenarios where dynamic surveillance is required.

IP Cameras: IP cameras use the internet to transmit video data, allowing for remote viewing and control. They are versatile and suitable for a wide range of applications.

Wireless Cameras: These cameras connect to the network wirelessly, making installation easier and more flexible. They are often used in residential settings.

360-Degree Cameras: Also known as fisheye cameras, they provide a panoramic view of an area, eliminating blind spots.

ANPR Cameras (Automatic Number Plate Recognition): These specialized cameras are designed to capture and recognize license plates, often used in traffic management and access control.

Wide Dynamic Range (WDR) Cameras: WDR cameras are suitable for areas with challenging lighting conditions, such as intense backlight or shadows.

PABX SYSTEM IP TELEPHONY

Hosted VoIP | SIP Trunking | UCaaS Mobile VoIP | WebRTC | 5G VoIP

Ultra is highly regarded in PABX Intercom System solutions. We provide a wide range of services that are designed to improve communication and connectivity for **businesses of all sizes**. With a strong commitment to staying at the forefront of technological advancements, our specialization lies in the **planning, installation, and maintenance of PABX intercom systems**, each one customized to meet the unique requirements of our clients.

What Sets us apart from Other IP Telephony service Providers?

Innovative technology Solutions

Providing advanced IP Telephony solutions and remaining current with the latest developments in VoIP technology to offer clients optimal tools for efficient communication.

Exceptional Customer Support

Providing outstanding customer service, including responsive technical support and tailored solutions that meet the specific needs of each client.

Competitive Pricing and Cost-Efficiency:

Offering cost-effective pricing models that deliver value for money, making the service accessible to businesses of all sizes while maintaining a high standard of quality.

Wi-Fi

Wi-Fi 6 | Wi-Fi 7 | Mesh Wi-Fi

In the world where connectivity is the King, We possess the expertise to create a wire-free world of connectivity for you. Our certified and skilled team excels in **configuring** seamless home and office networks, **seamlessly integrating** devices such as computers, tablets, printers, smart TVs, and various smart gadgets. Additionally, we prioritize the establishment of a secure network, adhering closely to the stringent guidelines set forth by industry leaders such as Etisalat and DU.

Ultra is a forward-thinking company dedicated to bringing advanced Wi-Fi solutions to your doorstep. With years of experience in the industry, we have established ourselves as a reliable partner for all your connectivity needs.

TIME ATTENDANCE AND DOOR ACCESS SYSTEM

At **Ultra** we believe that selecting the right time **attendance** and **door access** control systems for your business is crucial. Considering factors such as your specific needs, the size of your organization, and your budget. We Ensure that the system you choose is user-friendly, reliable, and scalable to accommodate your future growth.

Time attendance and door access control systems offer a **seamless way to manage employee** attendance, enhance security, and **boost overall efficiency** in your Business. Investing in these systems not only simplifies your daily operations but also ensures that your business stays competitive and compliant in today's fast-paced world.

Door access control systems, on the other hand, allow you to regulate who **enters and exits** your premises. They provide a secure and convenient way to manage access permissions, reduce **security risks**, and protect valuable assets.

INTERCOM

AUDIO | VIDEO

ELEVATE COMMUNICATION AND SECURITY WITH OUR AUDIO AND VIDEO INTERCOM SOLUTIONS

At **Ultra**, we specialize in the supply and installation of state-of-the-art **audio and video intercom** systems designed to meet the unique needs of our clients. With a commitment to quality, innovation, and **impeccable service**, we have established ourselves as a trusted partner in the ever-changing landscape of **communication and security solutions**.

In a rapidly evolving world, where technology has become the cornerstone of our daily lives, it's crucial to invest in cutting-edge communication and security solutions that not only enhance convenience but also **safeguard your premises**. That's where our company comes in, offering premium audio and video intercom systems tailored for both **offices and homes**.

AUTOMATION

HOME | OFFICE

“ EXPERIENCE THE FUTURE OF AUTOMATION ”

In a world that's becoming increasingly digital and interconnected, automation has emerged as a game-changer for both offices and homes. At **Ultra** we specialize in providing cutting-edge **automation devices** and **services** that cater to the unique needs of our clients.

WE OFFER WIDE RANGE OF AUTOMATION SERVICES THAT INCLUDES:

SMART LIGHTING: Smart lighting systems allow you to control the brightness, color, and scheduling of your lights through a smartphone app or voice commands. They can enhance energy efficiency and security by enabling remote control and automation of lighting.

Smart Thermostats: Smart thermostats like Nest and Aqara can learn your temperature preferences and adjust heating and cooling systems accordingly. They can be controlled remotely, adapt to your schedule, and help save energy and reduce utility bills.

HOME SECURITY SYSTEMS: These systems include smart doorbell cameras, motion sensors, window and door sensors, and surveillance cameras. They allow homeowners to monitor and secure their homes from anywhere, receive alerts, and even communicate with visitors at the door remotely.

SMART LOCKS: Smart locks provide keyless entry to your home through a smartphone app or keypad. You can control and monitor access, grant temporary access to guests or service providers, and receive notifications when someone enters or exits.

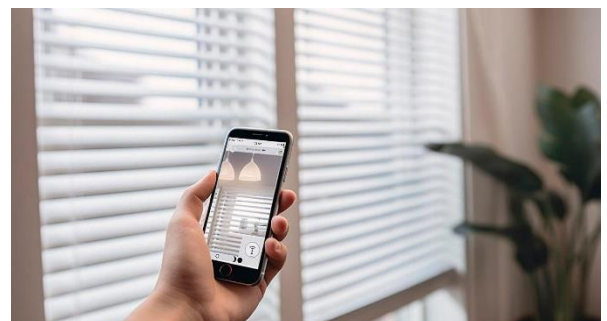

HOME ENTERTAINMENT SYSTEMS: This includes smart TVs, audio systems, and streaming devices like Amazon Fire TV or Roku. They enable voice control, integration with streaming services, and centralized control of your media.

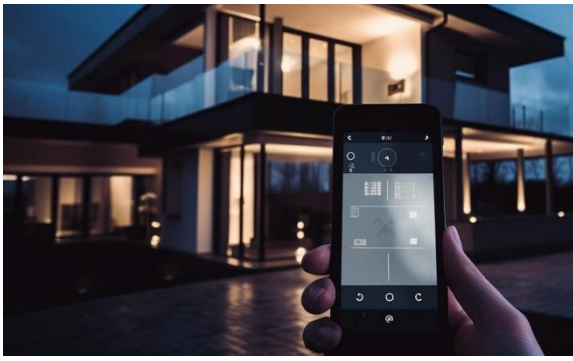

SMART APPLIANCES: Modern appliances like refrigerators, ovens, and washing machines can be connected to the internet and controlled remotely. They can provide alerts, status updates, and energy-saving features.

VOICE ASSISTANTS: Devices like Amazon Echo and Google Home serve as central hubs for controlling various smart devices in your home. They respond to voice commands and can integrate with other automation systems.

AUTOMATED WINDOW TREATMENTS: Smart blinds and curtains can be programmed to open and close at specific times or in response to environmental conditions, enhancing energy efficiency and privacy.

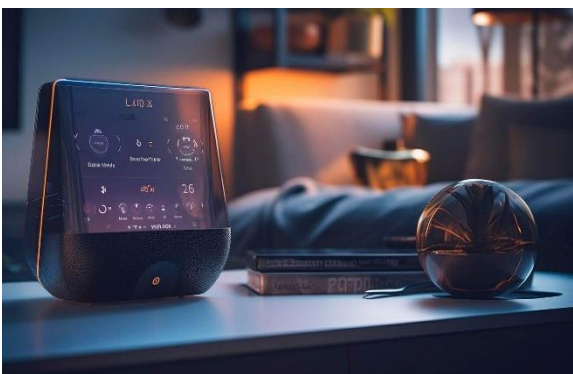

HOME ENERGY MANAGEMENT: Monitoring and controlling energy consumption in your home can help reduce utility bills. Smart meters, plugs, and energy management systems provide insights and automation for energy-efficient living.

SMART SENSORS: Various sensors, like motion detectors, temperature sensors, and environmental sensors, can trigger automation actions based on specific conditions. For example, lights turning on when motion is detected or the thermostat adjusting when a room gets too hot.

WATER LEAK DETECTION: These sensors can alert you to leaks and water damage, helping prevent costly repairs and insurance claims.

SMART HOME HUBS: These devices centralize control and communication between various smart devices in your home. They can help integrate and automate different systems to work together seamlessly.
